Appendix of Amendments

- 26. (Thrice Amended) An influenza antigen comprising a fusion product, said fusion product comprising
- (i) an immunogenic extracellular part of (a) an M2 membrane protein of a human influenza A virus, (b) an NB protein of a human influenza B virus, or (c) a CM2 protein of a human influenza C virus, and
 - (ii) a heterologous presenting carrier.
- 46. (Thrice Amended) An influenza antigen obtained by the following steps: providing a nucleic acid construct that encodes a fusion product, said fusion product comprising (i) an immunogenic extracellular part of (a) an M2 membrane protein of a human influenza A virus, (b) an NB protein of a human influenza B virus, or (c) a CM2 protein of a human influenza C virus, and (ii) a heterologous presenting peptide;

introducing the nucleic acid construct into an acceptor cell;

culturing the acceptor cell under conditions that allow expression of the fusion product; and

optionally isolating the fusion product from the acceptor cell or its culture medium,

thereby obtaining an influenza antigen comprising the fusion product.

- 54. (Twice Amended) An influenza antigen for an animal species comprising a fusion product, said fusion product comprising
- (i) an immunogenic extracellular part of (a) an M2 membrane protein of an influenza A virus or (b) an NB protein of an influenza B virus of said animal species; and
 - (ii) a heterologous presenting carrier.
